solar parking

Bluetop Long Span Solar Carports

This range of standardised carports create a long lasting green utilisation of your parking area. The structures are supplied as complete kits and solutions which can be integrated with all common PV-panels, including transparent glass-glass.

Innovative Product

New patented manufacturing techniques combined with innovative design makes solar parking affordable and attractive.

Installation

The roof structures including the PV-panels are assembled at ground level to optimise security and costs.

Materials

Posts, side rafters, sheets: hot galvanized according to DIN EN ISO-1461 Roof-profiles made of zinc-magnesium in accordance to DIN 55928-8 PV-mounting system: stainless steel or aluminium.

LS-1
A harmonious combination of design and function

LS-2
A double carport canopy for north-south orientations

LS-3
A double structure for east-west orientations

LS-4
A double structure for north-south orientation
